

**MGHS Test Change Implementation Notice**Effective immediately or as otherwise noted (**changes in bold**)**Test Changes****UDP-Glycuronosyl Transferase 1A1 TA Repeat Genotype, UGT1A1**

Profile Code: UGT1A  
Schedule: M-F  
Testing Time: 2 Days  
Methodology: PCR/Capillary Electrophoresis with Fragment Size Analysis  
Performing Lab: Mayo Medical Laboratories  
Reference Range: Separate Report Sent  
CPT Codes: UDP-Glycuronosyl Transferase 1A1 Repeat Genotype  
83898/Amplification of nucleic acid, each primer  
83909/Amplification and identification (capillary electrophoresis)  
83912/Interpretation and report

Rapid DNA extraction (always performed and carries an additional charge)  
83890

\*Please note that this test replaces U2934 in the MGHS test catalog. Reference Lab clients, please call for pricing.
