

Anesthesiology Elective

SUR 618

Prerequisite: Fourth year medical students who have successfully completed their Junior Surgery clerkship.

Objectives:

- Demonstrate improved skill in airway management.
- Understand the preoperative evaluation and preparation of the surgical patient.
- Enhance understanding of critical care physiology and pharmacology.
- Gain practical experience with invasive hemodynamic monitoring.
- Understand the basic approach to administering a general anesthetic.

This elective offers individualized teaching in the preoperative and postoperative methods of assessment and management of patients undergoing anesthesia prior to surgery.
