

**Physical Medicine & Rehab
MED 626**

Prerequisite: Fourth year medical students who have successfully completed their Internal Medicine clerkship.

Objectives:

- Become familiar with a comprehensive and multidisciplinary approach to rehabilitation medicine.
- Become familiar with laboratory, procedural and diagnostic data as it related to this field.

Students are assigned to a physical medicine service and spend time in both the outpatient setting and the inpatient unit at Marquette General Hospital. This course offers students an opportunity to become a member of a multidisciplinary team, and to learn the roles and contributions of the various health professionals in comprehensive rehabilitation medical care.
