QUESTION: My child’s school year is not beginning in person. Does he/she still need an annual physical and immunizations check?

ANSWER: Yes. Well visits are an essential part of keeping your child on the road to good health. They allow your child’s physician to conduct a full evaluation, monitor your child’s growth and developmental milestones, ensure that they are up-to-date on immunizations, answer any questions you may have and spot any potential health issues before they become serious. In fact, now is a great time to schedule your child’s annual visit. Physician offices are taking extra precautions to protect everyone’s health and safety, and your child’s doctor may...
As each of us does all that we can to stay safe and protect ourselves and our families, it has never been more important to stay on top of our health and seek the proper care when necessary. You may be wondering what receiving care in our facilities might look like right now. Read on to learn about all the ways we are working hard to keep you safe when you come visit us.

**Safety and Cleanliness**

UP Health System-Marquette has always been a clean and safe place to receive care. Effectively managing infectious diseases with proper sanitation and disinfection procedures has been and continues to be essential to ensuring a safe environment of care. Our environmental services team continues to implement effective cleaning and disinfecting practices throughout our hospital.

When you come for care, you can rest assured that we are committed to maintaining high standards of cleanliness in all of our facilities.

**Supplies and Staffing**

Our clinical teams are constantly monitoring supplies like personal protective equipment (PPE), medications and blood, as well as evaluating space and staffing needs, to make sure we have what we need to care for all of our patients. This includes patients who are coming in for planned procedures, as well as those seeking emergency and potential COVID-19 care.

**Screening**

Everyone who enters our facility—from patients and guests to employees and medical staff—is screened for COVID-19 symptoms, in accordance with CDC guidelines. This practice, which includes conducting temperature checks and asking a series of questions, helps protect not only our patients but our staff as well.

**Masking**

In accordance with CDC recommendations and Michigan state mandate, we have a universal masking policy currently in place. Just as we screen everyone who enters our facility, we also require that everyone, including patients, visitors and employees, wear a face mask at all times.

**Limited Visitor Policy**

Out of an abundance of caution, we have put a limited visitor policy in place. To further ensure the safety of our patients and employees, we are currently allowing each patient only one WELL visitor per stay at this time.

While COVID-19 is uncharted territory for our community, we can be confident that we are committed to providing a safe place to receive quality care when you need it, and we are continuing to seek ways to enhance your patient experience. To read even more about how we are keeping your safety a priority, visit patientexperience.uphealthsystem.com.

**3 to Help Stay COVID-Free**

Three simple actions to help stop the spread of COVID-19 and protect yourself, your family and your community:

1. **Wash Your Hands**
   - Wash your hands frequently with soap and water for at least 20 seconds. If soap and water are unavailable, clean your hands with an alcohol-based sanitizer that contains at least 60% alcohol.

2. **Practice Social Distancing**
   - Stay a safe distance—at least 6 feet apart—from others not in your household in both indoor and outdoor spaces. Six feet apart is about two arm’s length.

3. **Wear Face Masks**
   - Wear a face mask or cloth face covering that covers your nose and mouth. Both indoor and outdoor spaces, even if you don’t feel sick. Face masks and cloth face coverings can help protect others and prevent both asymptomatic and symptomatic spread of respiratory illnesses like COVID-19.

**Mission Moment**

Kelly J. December, BSN, MS, NE-C

**Hospital Supervisor**

UP Health System-Marquette

We are proud to announce that Kelly December is the recipient of UPHS - Marquette’s 2020 Mercy Award. Kelly is honored for her tireless work ethic, unwavering dedication and compassion she has for our patients, and her ability to mentor and lead every teammate who has the honor of working with her. The Mercy Award recognizes one employee from each of LifePoint Health’s hospitals who profoundly touch the lives of others and best represents the spirit and values on which the company was founded.

**DID YOU KNOW?**

UP Health System-Marquette is grateful to call the UP home, and we take pride in not only creating a place where you choose to come for healthcare, but also in making a positive impact in our community. Here are just a few ways we made a difference last year.

- We added 36 new providers and invested more than $35 million in capital improvements to help ensure that we continue to provide access to quality care and meet the evolving healthcare needs.
- We donated nearly $10 million in charity care because we believe that delivering care to all of our neighbors—regardless of their ability to pay—is foundational to our mission of Making Communities Healthier.
- We paid more than $27 million in taxes because we take our role as a community leader seriously and are dedicated to ensuring fiscal responsibility both within and outside our hospital walls.
- We distributed a payroll of more than $148 million to approximately 1,280 employees as part of our commitment to creating places where physicians want to practice and employees want to work, and where their contributions are valued.
- We supported a number of local organizations, including the Beacon House, Big Brothers Big Sisters, the Noquemanon Ski Marathon and more, because, as a leader in our region, we are committed to helping our community grow and be the best it can be for all of us.

**Meet Dr. Jacob Hakkola, MD**

Dr. Jacob Hakkola, MD has joined the team of UPHS – Marquette Interventional Radiology. An Escanaba, Michigan native, Dr. Hakkola earned his medical degree and completed his residency and fellowship at the University of Minnesota. Dr. Hakkola and the Interventional team provides minimally invasive image-guided diagnosis and treatment of disease. With access to state-of-the-art technology and innovative treatments, Dr. Hakkola and his team can help achieve the best results for our patients.
Could your next doctor visit be virtual?

Since the start of the COVID-19 pandemic, many providers are using telehealth as a safe, convenient alternative to an in-person visit. Could a telehealth appointment be right for you?

Telehealth visits are most appropriate for more routine visits to the doctor — such as if you are fighting a cold or sore throat, or have a question about a rash. Like an office visit, you’ll be able to ask a provider questions, receive quality care and a prescription for medication if appropriate — all from the comfort of your own home!

To schedule a virtual telehealth visit, call your provider to learn if telehealth is an offered option and appropriate for the nature of your visit. If your visit qualifies, your appointment will be scheduled and you will receive an emailed link to begin your visit when the time comes. All you will need is a computer or mobile device equipped with a camera.

Ask A Doctor

I have a chronic health condition. What should I be doing right now?

It’s important to stay in touch with your healthcare provider. Don’t hesitate to call with any questions or concerns you may have. Keep your regularly scheduled appointments. If you are concerned about coming to the office, ask your provider about the potential for a telehealth visit instead of an in-person visit. Don’t skip any doses of your medications, and make sure you have enough medications and other supplies on hand in case you need to stay home for an extended period of time. Above all, continue to stay on top of your health and do everything you can to protect yourself, including practicing good hand hygiene, staying at home as much as possible, wearing a facemask and social distancing when you need to get out.
